

HOTEL BOOKING PROJECT

WEBSITE NAME – (megumi)

WIREFRAME DOCUMENTATION

USAGE GUIDE —

( — low fidelity wireframe

 — high fidelity wireframe)

→ ***user interface***

😊 **HOME PAGE—**

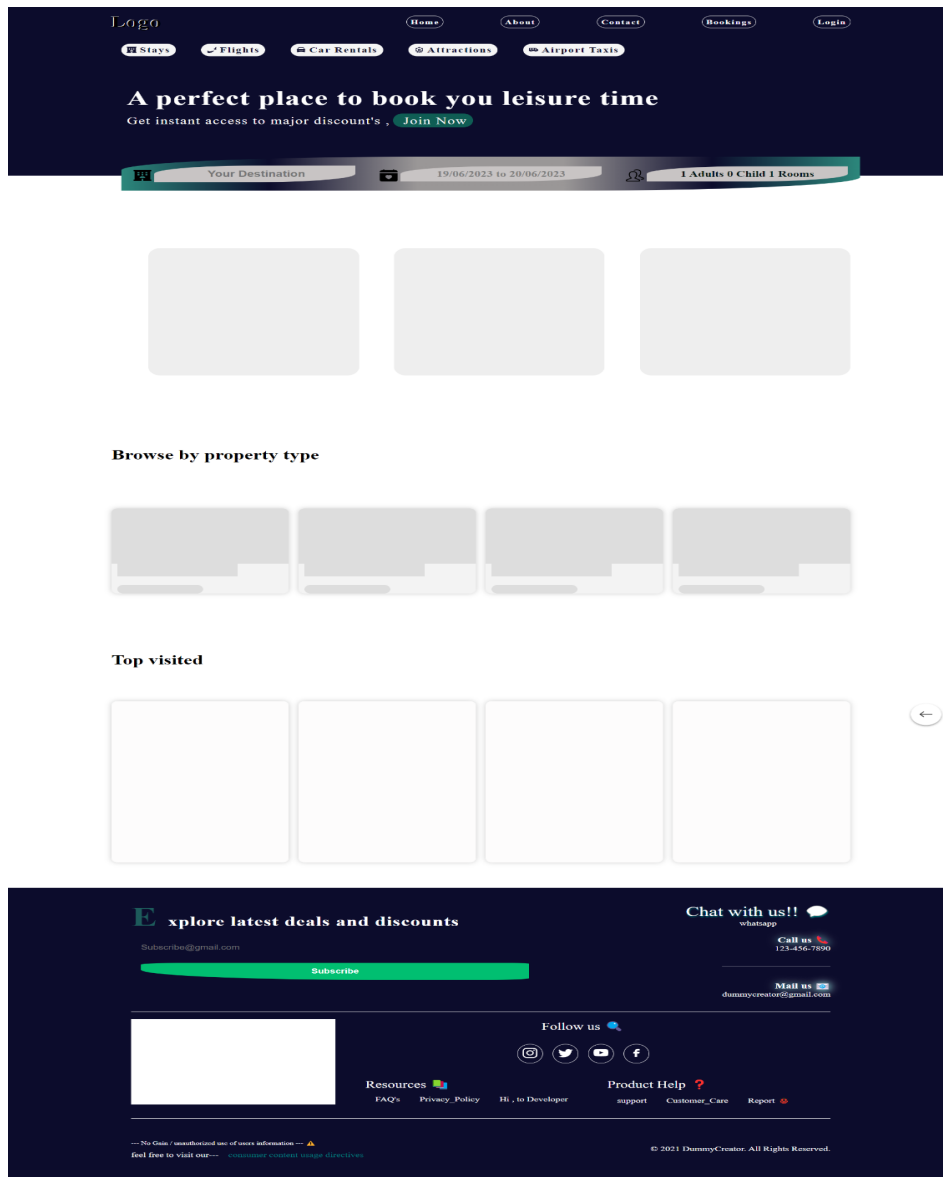

The first time user visit the website , he lands on this website homepage shown below :

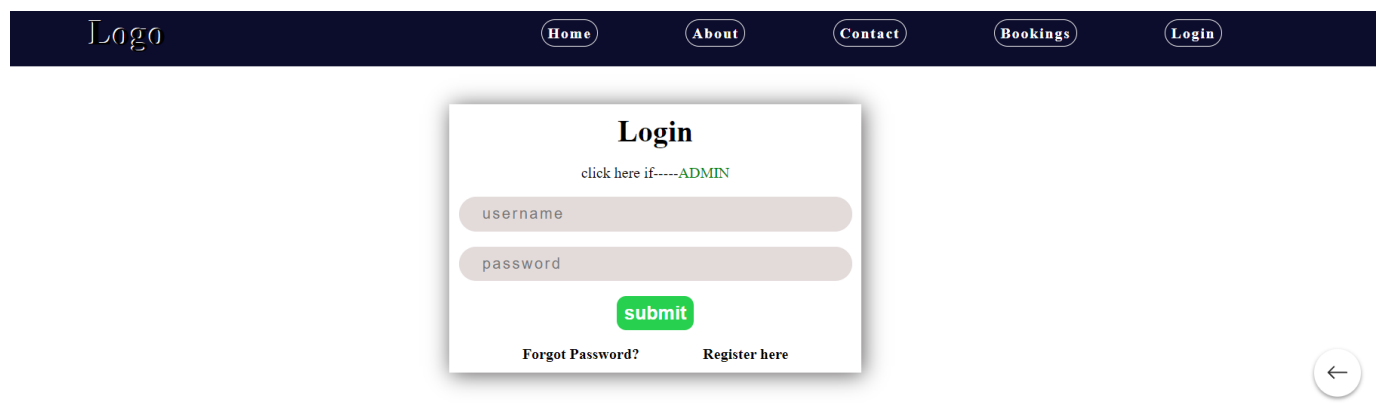

The wireframe shows a homepage layout on a grid background. At the top is a header bar containing a 'logo' on the left, three 'button' elements in the center, a 'profile logo' on the right, and another 'button' on the far right. Below the header is a row of four 'button' elements. Underneath these is a dark navigation bar with three white boxes labeled 'city', 'dates', and 'person'. The main content area consists of two rows of four square placeholders each. To the right of the second row is a circular 'back button' with the text 'X: 1030 px' below it. Below the main content area is a footer section with an 'email subscription' box on the left and a 'contact section' with two circular icons on the right. Below the footer is a wide bar containing a 'social links' section with four circular icons. At the very bottom are two 'footer notes' boxes. A vertical blue line is positioned on the right side of the grid.

-this page shows the hotels based on various categories like top cities, top visited , hotel type . user can select any one of them and can go to the hotel list page

The wireframe shows a login page layout on a grid background. At the top is a header bar containing a 'logo' on the left, three 'button' elements in the center, a 'profile logo' on the right, and another 'button' on the far right. The main content area is a large box containing a 'login' label, an 'admin link' label, two input fields, and a 'submit' button. A vertical blue line is positioned on the right side of the grid.

★ User can login from here or can search the website for hotels.

User can login and is redirected to the home page — or —
the admin can click here and is redirected to the admin page out there.

😊 **SEARCH FEATURE** —

Fill out the destination detail , booking dates and other filter you want to add .

A wireframe of a search form. It features three input fields at the top. The first field is labeled 'city'. Below the input fields is a large rectangular button area. To the right of the button area is a sidebar containing three horizontal rows, each with a toggle switch on the right.

—now this button appears once destination is added, click the button

A wireframe of a search form. It features three input fields labeled 'city', 'dates', and 'person'. Below the 'dates' field is a button labeled 'button'.

A mockup of a search interface. At the top, there is a dark blue header bar. On the left, there is a search bar with the text 'aspen'. In the center, there is a date range selector showing '19/06/2023 to 20/06/2023'. On the right, there is a filter dropdown showing '1 Adults 0 Child 1 Rooms'. Below the header bar, there are three search results. The first result is for 'jaipur' and shows a hotel building. The second result is for 'aspen' and shows a calendar for June 2023. The third result is for 'miami' and shows a poolside view. Each result has '1 properties' listed below it.
